

# Dreambox Weekly Homework

Dear Parent/Guardian,

This Friday we will begin our weekly Dreambox assignment. Dreambox is a web-based math program designed to support your child's understanding of the standards-based math curriculum. Students will have from Friday to the following Thursday evening to complete 5-8 lessons in the Dreambox program, with no less than 60 minutes required.

As your child works through the program, it will adjust lessons based on your child's individual needs. Depending on the skill, some lessons might seem easy and some may be more difficult. It is important to encourage your child to persevere through the lessons and use the embedded supports as needed.

At the end of each weekly session, there will be a "Dreambox Weekly Champ!" This will be the student who completed the greatest number of lessons that week! You will also receive a half-sheet that outlines the number of lessons and minutes that your child completed. This will need to be signed and returned the following school day.

Should you ever experience difficulty, please do not hesitate to email your child's teacher.

The Sixth Grade Team
