

Instructions to connect a hotspot to a computer for internet access - Chromebook

1. Charge the hotspot fully with the supplied cable and make sure it is powered on.
2. Look on the bottom of the hotspot, you will see a sticker with your SSID (Name of the network) on your hotspot, and the password.
3. Power on the chromebook, when you see the login screen look in the bottom right corner for a group of icons in an oval shape, click the group of icons.
4. A menu will open. Click the wifi icon in the top left corner of this menu.

5. A list of available networks will open. Choose the name that matches the name on the sticker of your hotspot. Click on it.

6. A window will pop up. Under the "Password" field, enter the name of the password on the sticker from the back of your hotspot. Click the "Connect" button and you will be connected to the internet.
